

## **PLEXITRAC® COATING #85XX**

### **DESCRIPTION:**

Plexitrac® Coating is a pigmented and flexible SBR coating that is specifically designed to top- coat SBR, EPDM, and other athletic track surfaces. Plexitrac Coating is a UV resistant colored topcoat that retards oxidation and raveling of the treated surface.

### **SURFACE USES:**

- Running Tracks
- Field Event Areas
- Jogging Surfaces

### **PACKAGE SIZES:**

- 55-gallon drum
- 275-gallon tote

### **APPLICATION:**

Structural spray unit approved by the manufacturer. Consult California Sports Surfaces for details.

### **COLOR:**

Black, Red, Blue, Green - other colors available by special order

### **COVERAGE:**

.05 gal. per square yard, per coat. Total system: .1 gal. per square yard.

### **MIXING:**

Mix two (2) parts Plexitrac Coating to one (1) part potable water.

### **LIMITATIONS:**

- Apply only when ambient and surface temperature is 55°F/13°C and rising and below 130°F/55°C
- Do not apply when rain or high humidity is imminent.
- Do not allow spillage to dry on surface
- Keep from material from freezing
- Do not store in direct sunlight
- Plexitrac Coating will not correct inherent deficiencies of the existing surfacing system
