THE PROJECT

Queenstown Events Centre serves as a major sporting venue for the region, catering to local clubs, schools and community programs. Over time, the centre's outdoor netball and tennis courts had deteriorated, with the aging asphalt surfaces limiting performance and usability.

THE SOLUTION

Queenstown Lakes District Council commissioned a full resurfacing by trusted contractor Hardwood Technology, installing the Rebound Ace HSA system for improved safety, comfort and all-weather performance. Two courts were reinforced with a fibreglass overlay, and all were finished in Grass Green and Byron Blue using Synpave, creating a durable, high-quality surface for multi-sport use.
