SNEAKY CAT PICKLEBALL

THE PROJECT

With pickleball's explosive growth across Australia, clubs are seeking dedicated facilities that can support member retention, and attract new players across all ability levels.

Sneaky Cat Pickleball recognised the opportunity to establish Thurgoona's first purpose-built pickleball club, requiring premium court surfaces that would deliver the performance and durability essential for sustained club operations and member satisfaction.

THE SOLUTION

Matchpoint Systems installed the Rebound Ace HSA mat lay system across all seven indoor courts, delivering the consistent playing experience that drives club membership growth. The HSA system provides superior shock absorption and ball response consistency that members expect from premium club facilities.

The Byron Blue and Slate Grey Ultra topcoat creates optimal ball visibility for competitive play, while reinforcing the professional club environment that attracts serious players and builds long-term membership value.

The versatile surface system now accommodates pickleball's full spectrum of play, establishing Thurgoona as a premier destination, for socials games through to competitive tournaments.
